the vehicle, fault of a cyclist, road conditions, weather factors or folly of a pedestrian—played a minor role.

Worried by the number of people killed on roads, especially in the developing world, the UN has asked governments to compile a data on accidents in a format developed under its Asia-Pacific Road Accident Database project. The project tries to understand the reasons behind fatal road accidents in a particular country and then get city government to tackle them.

► Maharashtra the worst in India, P 6

ATKERS... gan, thousands of people, including conservative religious groups, took to streets nationwide on Saturday to denounce the terror groups and demand a new offensive against the Taliban. On Friday, two suicide bombers had attacked a Sufi shrine in Lahore's, killing 43. P 18
